

RHH FOAM SYSTEMS ANNOUNCES THE LAUNCH OF NEW VERSI-FOAM WEBSITE

Posted on March 13, 2019 by Versi-Foam

Category: [News](#)

Today we are very pleased and excited to announce the recent launch of our brand new Versi-Foam website. The new site highlights each product in the Versi-Foam line and makes product information easier to find and understand.

[Richard Heitzer](#) founded Versi-Foam in 1981 after he developed the patented U-Control dispenser. The dispenser allows you to regulate the quantity and rate of spray foam insulation being dispensed. Today Versi-Foam is used in dozens of applications including residential and commercial construction, marine flotation, movie props, cold storage, and vehicle insulation.

Here are few things to check out on the new website:

1. The "Spray It, Don't Pay It" [Foam Insulation Calculator](#). Use this tool to accurately estimate the amount of spray foam you will need for your project. First, enter values for foam density, foam thickness, and square footage. Then click the "calculate" button to see how many Versi-Foam spray kits you need to complete your job.
2. Our "Pull The Trigger Now" [Dealer Locator](#). Use our interactive map to find the Versi-Foam dealer closest to you, or search by state or county.
3. "[Check Out The Tech Specs](#)" is a new page that combines all our technical specification literature in one convenient location. For some products we have safety sheets available in both English and Spanish.
4. The Versi-Foam [Video Collection](#). Here you can find how-to, trouble-shooting, and safety videos, as well as a Versi-Foam product overview.

We invite you to explore the entire Versi-Foam website. We believe you will find it easier to navigate, easier to understand, and easier to find exactly what you're looking for.
