

COMMERCIAL INSULATION

Posted on March 11, 2019 by Versi-Foam

Commercial insulation applications for construction projects often present challenges to property owners, architects, and contractors. Whether the focus of the commercial build or renovation is to address insulation issues, condensation in crawl spaces or attics, air sealing or sound dampening, Versi-Foam® commercial spray foam insulation kits get the job done.

In our energy-conscious world, one of the key phrases is "[Building Envelope](#)," which is the system of components that protects against movement of air, moisture and heat. Versi-Foam® is one of the most efficient insulation materials available. Easily spray an application layer of Versi-Foam® onto the surface to provide excellent insulation in lesser thicknesses than other insulating materials.

The team at RHH Foam Systems know that air movement and moisture control must be taken into consideration on any commercial building project. Versi-Foam® is an expandable commercial insulation foam that will completely seal any gaps and crevices preventing air infiltration, moisture infiltration, as well as the intrusion of dirt and pollutants from the outdoors. In addition, large gaps and crevices are easily filled using our patented U-Control dispensing gun.

Construction Spray Foam Kits

Finding the right foam insulation kit for your construction project is key. Versi-Foam® spray foam is engineered to meet the needs of commercial builders. Not only does the Versi-Foam® spray insulation formula ensure all cracks and crevices are sealed air-tight, we also made our insulation kits easy to apply, saving you time and money on all [commercial](#) insulation projects.

Soundproof

Versi-Foam® commercial spray foam will act as a sound dampening material, softening surfaces to reduce echo, and will inhibit the passage of sound from one area to another.

Insulate Against the Cold

Today's commercial builders are tasked with ensuring commercial projects are made as energy efficient as possible. With Versi-Foam® spray foam insulation kits, your job is made easy. Spray

foam insulate commercial projects with confidence, knowing that Versi-Foam® insulation is a powerful sealant made with an industry-leading formula and backed by commercial builders all over the country.

Eliminate Condensation in Attics or Crawl Spaces

Whether your commercial project is a new build or a renovation, it's never been more important to ensure condensation and water build up in areas like attics, basements and crawl spaces are addressed professionally. Versi-Foam® spray foam insulation makes quick work of any sealant project and prevents condensation from causing mold or other destruction for years to come.

Consider Versi-Foam® spray foam kits for new construction and retrofit of commercial buildings - offices, universities, hotels, restaurants, shopping malls, retail outlets, warehouses, health care facilities, airports, sports centers and more.

Choose Standard (non-fire rated formula) or Class I (E-84 Class I containing additional flame retardants) for your specific commercial insulation needs. Commercial construction is only one of the many applications for Versi-Foam. We have distributors of our spray foam products in many areas. Use our contact form or call us to find one in your area. Insulation is our business.
