

# INSULATION FOR VEHICLES

*Posted on March 11, 2019 by Versi-Foam*

Versi-Foam® provides superior insulation for vehicles such as trucks, vans, RVs, and buses. Most refrigerated trucks, trailers, sea containers, and vans have polyurethane foam in the walls, ceiling and floors to provide insulation for temperature control. Repairs are simplified using Versi-Foam disposable foam kits. Their portability allows for ease of use without requiring a separate or pressure source.

Side walls, roofs, and floors are easily covered using the multi-purpose mixing nozzles included with every system, with an optional fan spray nozzle available for wider coverage. Because the flow of chemical is controlled by the pull of the trigger, hard to reach areas and tight spots are easily insulated using Versi-Foam.

Buses and RV's that have air conditioning for summer months, and heat for colder climate conditions, are easily insulated using Versi-Foam kits. In addition, the sound barrier helps reduce noise from outside.

Contact us if you would like to discuss your specific application for vehicles. We have distributors of our spray foam products in many areas. Insulation is our business.
